

### Challenge 5: Promote recycling at sporting events (2 credits)

Who doesn't love a good Friday night football or basketball game? Often, a big problem after any of these events is the accumulated trash afterwards in the stands, on the floors, and even around the trash bins, which could also be recycled!

Students are encouraged to take the initiative in making sure recyclable items are being collected for recycling, rather than being thrown away with the rest of the trash. Cheerleaders, band members, student section leaders, and/or any other students present at the hosted/home sporting event can take laps around the gym/field/etc., and around the stands with bags and pick up any bottles, cans, etc. Students can make their laps during time outs, half-time, and/or after each event.

At least 5 students are encouraged to walk around each time; minimum of 5 sporting events (football, soccer, volleyball, cross country, basketball, etc.)

To receive the 2 credits for this challenge, your semester report will have to include:

- For each sporting event, a sheet that lists:
  - The names of the students who participated in helping out at each event
  - What the event they participated in was (sport, date, location)
  - A rough estimate of the quantity of recyclables collected at the event
- Pictures of the students carrying the bags and having fun at the event (if possible)!
