

Challenge 1: Create a school-wide Green Board (1 credit)

You're probably thinking to yourself, "What in the world is a Green Board?" A Green Board is a bulletin board where teachers and students can post ideas on how to reduce waste. This can be a great tool for building an eco-friendly culture at your school. You should put your Green Board in a visible space that everyone can see, such as right outside the cafeteria or near the entrance of the school.

Ideas can include classroom decorations that are made from materials that would otherwise go in the trash, or it can be useful online tools to allow students to perform homework digitally, instead of on paper. To receive credit for this challenge, your semester report will have to include:

Virtually transfer Green Boards using a few tools. Information regularly found on the board can be visually shared on the web by using resources such as Powerpoint, [Canva](#) or [Miro](#).

To receive credit, submit a picture of your Green Board with 5 posted waste reduction ideas
