

Challenge 3: Students present a recycling project to community leaders (2 credits)

This challenge is a great way to not only have students learn about recycling, but how to be an active citizen as well. This can either be done by a school club or a class.

Community leaders can include a city mayor, a town council, county commissioners, or a school board. Here are a few project ideas for your students

1. Students can research how other cities recycle and how those ideas can be used in their own city
2. Students can research what materials make the biggest contribution to waste in their area/school and how to reduce those waste materials

To receive credit for this challenge, your semester report will have to include:

- A picture of students presenting to community leaders
- Students' slide deck presentation (optional)
